The Office of National Drug Control Policy (ONDCP), established by the Anti-Drug Abuse Act of 1988, and reauthorized by the Office of National Drug Control Policy Reauthorization Act of 2006, is charged with developing policies, objectives and priorities for the National Drug Control Program. In addition, ONDCP administers the High Intensity Drug Trafficking Areas Program and the Drug Free Communities (DFC) Support Program. (Descriptions of these programs are found in the Federal Drug Control Programs section of this Appendix.)

For 2016, the account provides funding for personnel compensation, travel, rent, and other basic operations of the Office.

The Administration will submit a reauthorization bill to the Congress that authorizes ONDCP through FY 2020. The bill will contain several changes that reflect a 21st century drug policy approach—to include streamlining the agency functions and improving coordination and collaboration among its many stakeholders. Additionally, the DFC reauthorization will be submitted to the Congress as a separate bill as an important part of the Administration's emphasis on prevention strategies.

Data-Driven Innovation (DDI) funding promotes increased and improved use of data and evaluation to improve the impact and cost-effectiveness of Federal Government programs. OMB may transfer DDI funds to Federal agencies to lead cross-program projects and evaluations. Examples of such projects and evaluations include: (1) implementing new grant designs that reflect data-driven, outcome-focused approaches; (2) expanding the use of rigorous evaluation and other evidence-building tools, including use of rapid experimentation for continuous improvement; (3) increasing access to and utilization of high quality data for evaluation, performance measurement, and other types of analyses; and (4) partnering with innovative leaders in States, localities, foundations, research organizations, and the private sector experts to create conditions for cost-effective change at all levels of government.

Funded from fiscal year 2010 through 2013, the Partnership Fund invested over \$29 million in 11 pilot projects, which are estimated to lead to total savings of up to \$200 million annually if the pilots are implemented more broadly. As evaluations are completed and results finalized, OMB will work with Federal agencies, State and local governments, and other stakeholders to disseminate lessons learned and apply the tested tools and methods across programs and levels of government. Early pilot results show how access to data from financial institutions could help to detect overpayments in the Unemployment Insurance program, how automated risk assessment tools using integrated data from State Medicaid and the Federal Medicare programs could help identify provider fraud, and how a shared services solution could help States verify Medicaid provider eligibility.

Information Technology Oversight and Reform (ITOR) funding provides the Government with a resource base controlled by the Director of the Office of Management and Budget (OMB) to support activities and tools that enhance the efficiency, effectiveness, and security of Federal investments in information technology (IT). ITOR goals are to: (1) reduce waste and duplication, and ensure that IT investments stay within their budgets and deliver on time, (2) help agencies deliver IT investments that maximize the Government's productivity and customer satisfaction, and (3) expand the use of data and analytics to support agency IT portfolio management. In addition, ITOR funding provides for continued enhancements to OMB's oversight of cybersecurity threat mitigation activities, with the goals of improving agency reporting and analysis of cybersecurity activities, and migrating to a government-wide, continuous diagnostics and mitigation framework.

Information Technology Oversight.—Under the direction of the Federal Chief Information Officer (CIO), ITOR funding will be used to enhance transparency, data collection, analytics, and technical assistance in Federal IT investments. ITOR oversight activities will support continued operations of and enhancements to the Federal IT Dashboard, improving the public's view of the Government's over \$80 billion annual investment in IT, discussed in Chapter 17 of the Analytical Perspectives volume of the Budget. Building on data from the IT Dashboard and an integrated agency data collection process, the Federal CIO will continue to engage with agencies through PortfolioStat reviews, identifying underperforming and duplicative investments and taking corrective actions. ITOR oversight activities will increase the productivity of IT investments by, for example, optimizing and consolidating data centers under the Federal Data Center Consolidation Initiative, continuing the adoption of cloud computing, and increasing the use of intra-agency and interagency shared services.

Federal IT Effectiveness.—In addition to oversight activities, ITOR funding will be used to improve the effectiveness of Federal IT investments by analyzing ways to improve the digital experiences that individuals and

businesses have with the Government. This includes expanding the U.S. Digital Service, a team of America's best digital experts that works to implement leading-edge digital technology practices in the nation's highest-impact programs.

Cybersecurity.—ITOR funding for cybersecurity will expand OMB's oversight of agencies' use of cybersecurity funding and the 2015–2017 Cybersecurity Cross Agency Priority (CAP) goal, which is focused on agencies managing information risk on a continuous basis, addressing the need for anti-phishing and malware defense measures, and advancing key identity management initiatives.

The Spectrum Relocation Fund (SRF), created by the Commercial Spectrum Enhancement Act of 2004, as amended by the Middle Class Tax Relief and Job Creation Act of 2012, reimburses Federal agencies that must relocate wireless communications systems from Federal spectrum that has been or will be reallocated to commercial use. Auction receipts associated with the reallocated spectrum are deposited into the SRF to pay eligible pre- and post-auction costs that help efficiently and effectively transition Federal agencies off of the reallocated spectrum. The Office of Management and Budget (OMB) administers the SRF in consultation with the National Telecommunications and Information Administration (NTIA) of the Department of Commerce. In 2015, a portion of receipts associated with the Advanced Wireless Services 3 (AWS-3) auction, which reallocates Federal spectrum for commercial use, will be deposited into the SRF and transferred to agencies with approved transition plans to reimburse them for the costs associated with clearing the auctioned bands.

The Budget proposes expanding eligible uses of the SRF by amending or eliminating certain existing restrictions to facilitate more efficient spectrum usage and telecommunications investment by Federal agencies, as well as make more Federal spectrum available for commercial applications such as mobile broadband. The proposal is expected to enable productive use of balances in the SRF for high return-on-investment activities that are expected to increase the value of future auctions or sharing arrangements of Federal spectrum by roughly a billion dollars. In addition to generating deficit reduction for taxpayers, the proposal will also support

the President's goal of making available an additional 500 megahertz of spectrum for commercial use by 2020.
